** Newly created category combining two or more reportable diseases/conditions. Five-year averages are currently unavailable.

**TO REPORT DISEASES BY TELEPHONE:**

Animal bite consults: Al Piercy 704.336.6440

Sexually Transmitted Diseases and HIV/AIDS: 704.432.1742

Suspected Foodborne Outbreaks: Bill Hardister 704.336.5533

Tuberculosis: Kristi McCray 704.432.2496

Report forms can now be found on-line at: http://cdcontrol.charmeck.org

1 The cumulative number for HIV Disease (not AIDS) is 5,499 in Mecklenburg County and 31,282 in North Carolina. This figure is based on reports of confidential testing done between January 1990 - December 2006. Please note a change reflecting recent changes in North Carolina reporting, “HIV Disease” refers to all people infected with human immunodeficiency virus, with or without an AIDS defining condition. Previously data were reported separately for HIV and AIDS. Currently AIDS cases are subset of HIV disease. AIDS case reporting began in the United States in 1981 and North Carolina in 1984. HIV infection reporting began in North Carolina in January 1990 and HIV disease reporting in 2001.

2 **Category A Bioterrorism Agents/Disease** including pathogens that are rarely seen in the United States and that pose a risk to national security because they can be easily disseminated or transmitted from person to person; result in high mortality rates and have the potential for major public health impact; might cause public panic and social disruption; and require special action for public health preparedness.

3 Two cases of rabies were reported: 1 cat, 1 raccoon
