### TO REPORT DISEASES BY TELEPHONE:

#### Animal Bite Consults: 980.314.9210

#### General Diseases including Hepatitis: B: Bellinda Worsham: 980.314.9203 Beth Quinn: 980.314.9205 Freda Grant: 980.314.9204 Shawn Wilson: 980.314.9208

#### Syphilis & HIV/AIDS: 980.314.9226 or 704.614.2993 Other STDs: 704.432.1742

#### Suspected Foodborne Outbreaks: Bill Hardister 980.314.1636

#### Tuberculosis: Yolonda Cochran 980.314.9477

### Report forms can now be found on-line at: [http://www.meckhealth.org](http://www.meckhealth.org)

1. 289 newly diagnosed HIV disease cases and 144 newly diagnosed AIDS cases were reported in Mecklenburg County during 2015 (based upon the most recent surveillance data). During the same time period, there were 405 newly diagnosed Syphilis cases (primary, secondary and early latent). Readers should note that HIV disease represents all diagnoses of HIV infection regardless of the stage of the disease. Therefore AIDS cases are considered a subset of HIV Disease. HIV disease reports and AIDS case reports should never be combined to estimate an infected population, and should be considered separately.

2. Category A Bioterrorism Agents/Disease including pathogens that are rarely seen in the United States and that pose a risk to national security because they can be easily disseminated or transmitted from person to person; result in high mortality rates and have the potential for major public health impact; might cause public panic and social disruption; and require special action for public health preparedness.

3. Case numbers are lower than expected or not available due to transition to a new reporting system.

4. Rabies: 1 Beaver (September)
