

Appendix B
MCAQ Actions and Recommendations
Charlotte Pipe & Foundry Company, Inc.
Title V Permit Renewal
Draft Permit No. 19-01V-626
June 21, 2019

Based on a review of comments received regarding renewal of the Charlotte Pipe & Foundry Company, Inc. (“CP&F”) Title V Renewal Permit, MCAQ proposes to issue Permit No. 19-01V-626 as drafted. No substantive changes were made to terms or conditions in the draft permit. MCAQ believes all applicable federal, state, and local requirements are correctly reflected in the permit.

MCAQ also intends to take the following actions as a result of comments received:

1. An Environmental Justice analysis for the area surrounding CP&F will be conducted. The final study will be available at the end of that process.
2. Regarding ongoing reports of odor, MCAQ will ensure that odor management techniques are evaluated when CP&F plans any new construction or modification of emission sources. Furthermore, MCAQ will review and assess the latest technology in odor controls annually for comparison to the facility’s existing odor control system.
3. MCAQ will investigate the reports of offsite particulate deposition attributed to CP&F through a series of inspections and response to reports of visible emissions.
4. MCAQ recommends that CP&F engage in discussions with leaders from the surrounding neighborhoods as a forum to evaluate suggested actions to benefit the community.
