

MASTER LIST OF MATERIALS USED

Instructions for Form D1-1

Form D1-1 provides an updated list of all coatings, inks, solvents, etc. that are being used by the facility. This form should also be updated and resubmitted when reporting new materials to MCAQ.

MATERIAL NAME - Enter the name of the material as it appears on the Material Safety Data Sheet (MSDS).

COATING ID# (Optional) - Enter the ID # that has been assigned to this individual coating. This is not required by MCAQ; however, if the facility refers to a coating by a separate ID number, please include the ID number.

VOC CONTENT & UNIT - Enter the VOC content and the unit in which the VOC content is reported. A facility may select the unit of measure that is more convenient for emission calculations (e.g. lbs/gal or % by wt). If lbs/gal is selected, enter the lbs of VOC per gallon of the material in the "VOC Content" column and "lbs/gal" in the "Unit" column. If % by weight is selected, enter the percentage of VOC content of the material in the "VOC Content" column and "% by wt" in the "Unit" column. This information can be obtained from the MSDS or from the vendor.

EMISSION SOURCE ID(s) WHERE MATERIAL IS USED - Enter the emission source ID number(s) for the equipment where the material is used. The ID number(s) should correspond to those reported on the Form A-4.

SECTION D

MASTER LIST OF MATERIALS USED

(e.g. coatings, inks, solvents)

D1-1

An up to date copy of this form should be submitted each time new material information is submitted to MCAQ. This list should be kept up to Date at all times. A copy of the most current version of this list should be kept on site.

Material Name	Material ID No. (optional)	MSDS Date	VOC Content (amount in chosen unit)	Unit (choose lb/gal or % by weight)	Emission Source ID No(s). where material is used (e.g. ES-01)
