What is required on the construction plans

How do I determine what necessary Information is required on the Construction Documents?

We have the general information listed on the web site, www.meckpermit.com. You can find additional information in our Plan Submittal Guidelines.

Commercial Plan Review Process

What process do I use get my plans reviewed?

There are 3 processes that can be used depending on project description.

- 1. CTAC Review-** CTAC will review Racking / Shelving Systems for new commercial buildings or existing buildings as long as they are not higher than 11.5 feet in height including the stocking height, and **NOT** a change of use or **NOT** a change of occupancy clarification or a Hazardous occupancy.
- 2. OnSchedule Review Process-** This process will review all projects that are not contractor ready. Please follow [this link](#) for further information.
- 3. Express Review –** This is a premium service and we have information about the requirements on our website.
