SUBDIVISION:_________________________________________________________________

ANTICIPATED START DATE OF CONSTRUCTION:_____________________________________

JURISDICTION:

□ 0 – Mecklenburg    □ 2 – Davidson    □ 3 – Cornelius
□ 1 – Charlotte   □ 6 – Huntersville    □ 4 – Pineville
□ 5 – Matthews    □ 7 – Mint Hill

(Check Only One)

Is the property located within Charlotte’s Extra-Territorial Jurisdiction (ETJ)?  □ Yes  □ No

Please read the back of this form before completing this section.

For single-family and two-family residential sites, choose one of the following options:
□ The most appropriate, from the back of this Notice, is option ___ or a combination of options ___ & ___.
□ The sedimentation control devices will be installed and maintained as drawn in the space to the right.

Does the site have stream/lake buffer requirements?

□ Yes □ No

If yes, pick the total width of the buffer from the top of creek bank or lake shoreline:

□ 35 feet □ 50 feet □ 100 feet □ entire floodplain
□ 100 feet plus 50% of floodway fringe

Erosion & Sedimentation Control Plan Options
For Single-Family & Two-Family Lots

The Soil Erosion & Sedimentation Control Ordinance requires that anyone conducting land-disturbing activity prevent sediment from leaving the disturbed site. **Furthermore, conducting any land-disturbing activity of one acre or more requires a permit before beginning the disturbance.** This includes the disturbance of multiple lots totaling one acre or more, regardless of proximity to each other within a subdivision; or in cases where fill material is stockpiled, needed, or wasted, the area where the material is stored, coming from, or going to, must also be included in the total disturbed area. Land-disturbing activities are defined as anything which changes the topography or natural ground cover making an area susceptible to accelerated erosion, including demolition and land clearing. Sites greater than one acre are also subject to State Permit #NCG010000 and required to maintain self-inspection logbooks. Erosion & Sedimentation Control measures must be installed per details found in Section 30 of the Charlotte-Mecklenburg Land Development Standards Manual. If you are disturbing one acre or more, please call 704-336-6692 for the City of Charlotte jurisdiction or 704-336-3720 for the surrounding towns to obtain permit application requirements.

Failure to maintain Erosion & Sedimentation Control measures may result in penalties of up to $5000/day. In addition, all properties must comply with the S.W.I.M. Stream Buffer Ordinance and Drinking Water Supply Watershed Ordinances (Lake Buffers). For general buffer requirements, access the Surface Water Quality Data website at [http://maps.co.mecklenburg.nc.us/website/swim](http://maps.co.mecklenburg.nc.us/website/swim), click on the mailbox icon, and then follow the instructions.

### SEDIMENTATION & EROSION CONTROL OPTIONS

**INSTRUCTIONS:** Identify one or any combination of letters for the sedimentation control schematic that best describes the measures that will be used on this property during construction.

**Legend**
- Silt Fence
- Construction Entrance
- Direction of Flow (Point downhill)
- Barricade Fence (Such as silt fence, tree protection fence, etc.)
