

Clark's Creek & Mallard Creek Greenways

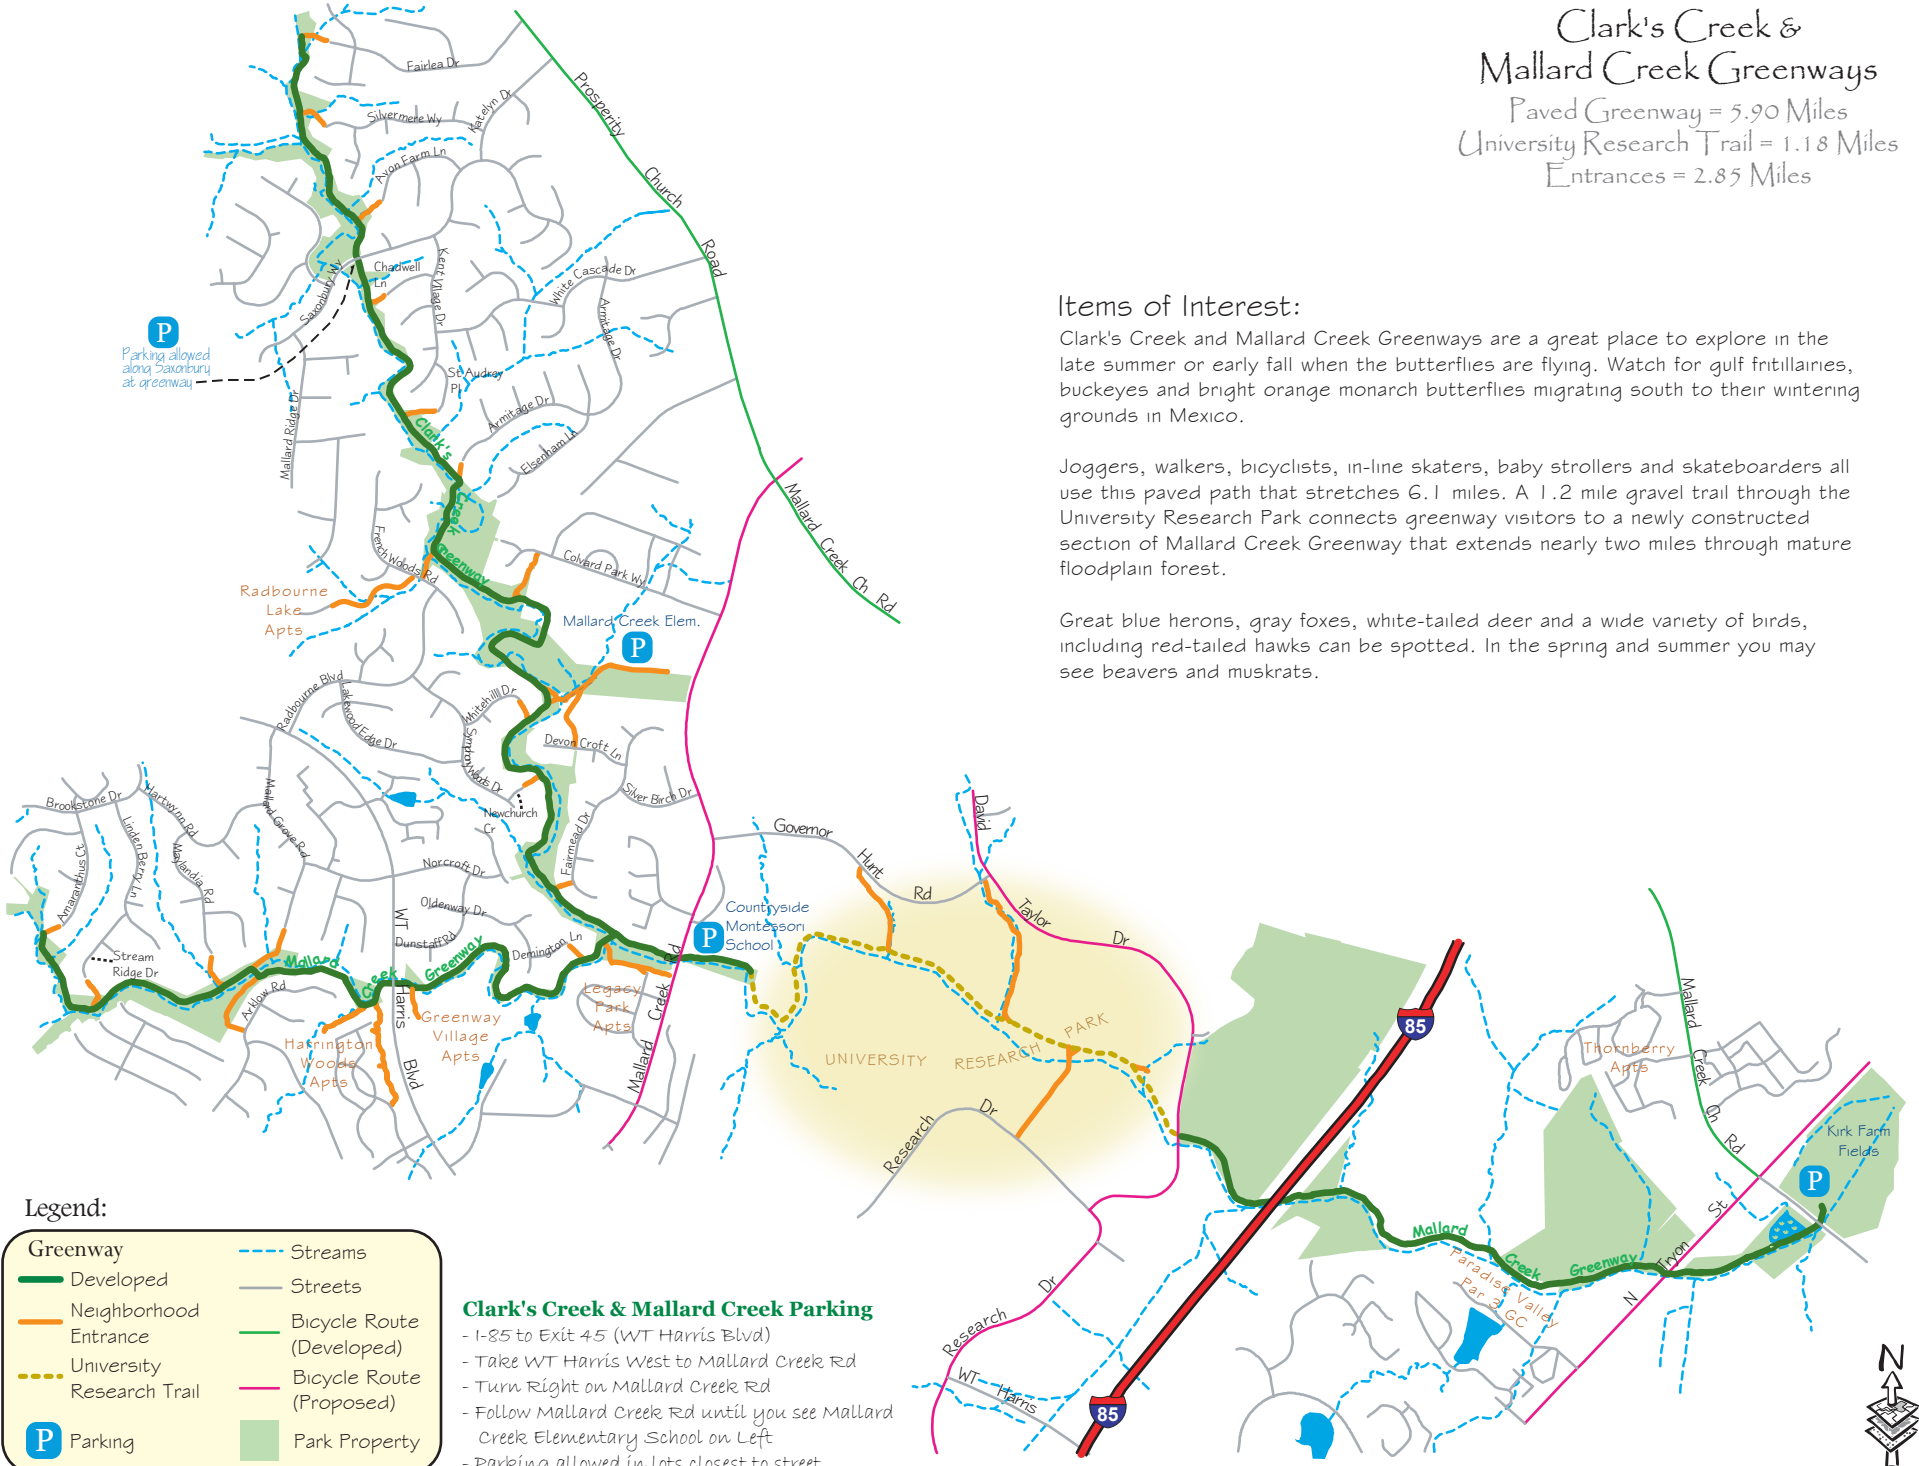

Paved Greenway = 5.90 Miles
 University Research Trail = 1.18 Miles
 Entrances = 2.85 Miles

Items of Interest:

Clark's Creek and Mallard Creek Greenways are a great place to explore in the late summer or early fall when the butterflies are flying. Watch for gulf fritillaries, buckeyes and bright orange monarch butterflies migrating south to their wintering grounds in Mexico.

Joggers, walkers, bicyclists, in-line skaters, baby strollers and skateboarders all use this paved path that stretches 6.1 miles. A 1.2 mile gravel trail through the University Research Park connects greenway visitors to a newly constructed section of Mallard Creek Greenway that extends nearly two miles through mature floodplain forest.

Great blue herons, gray foxes, white-tailed deer and a wide variety of birds, including red-tailed hawks can be spotted. In the spring and summer you may see beavers and muskrats.

Legend:

Greenway	Streams
Neighborhood Entrance	Streets
University Research Trail	Bicycle Route (Developed)
Parking	Bicycle Route (Proposed)
	Park Property

- Clark's Creek & Mallard Creek Parking**
